Other Technologies: iOS Frameworks, Amazon Web Services, xCode, Content Management Systems, Github, OOP, R&D

Work Summary

Apple Inc.
Media Data Curator
July 2015 - February 2017

- Successfully completed multiple time-sensitive projects after the announcement of tvOS in Fall of 2015.
- Curated thousands of digital content data from different partners to ensure universal search provides the best user experience when using Siri in any tvOS or iOS platforms.
- Submitted bug reports to external partners for incorrect data.
- Proposed a new feature to our CMS to help curators with the process. Feature was built.
- Assisted managers with on-boarding review of new business partners.

Google (via Vaco)
Operations Specialist: Google Play
July 2014 - July 2015

- Tagged hundreds of South Korean, Japanese, Italian and other foreign films for operations purposes prior ingesting to Google Play.
- Conducted an outstanding research of all related media content and updated Google database for discrepancies.
- Weekly collaboration with Google stakeholders to report trends and work progress.

Tesla Motors
Product Specialist, Final Quality
April 2014 - July 2014

- Responsible for vehicle's interior and exterior final inspection prior releasing the product.
- Tested interior LCD display interface for software bugs and function.
- Tested product for failures, sending failed products back to repair and production.

Bloom Energy
Quality Technician III
August 2012 - April 2014

- Completed multiple engineering R&D projects containing prototype materials from different global territories. These materials were on development stage/non-conforming.
- Used engineering deviations to allow non-conforming components in production.
- Reported trend, created report and provided analytical observations of findings to engineers and managers.
- Processed, disposed, and perform inventory to different materials, including non-conforming materials into MRB by using Oracle database.

Google (Randstad)
Quality Analyst, eBook
August 2010 - August 2012

- Achieved the top reviewer of the month recognition with an error rate of <.05%.
- Successfully curated international eBook projects for Italy, France and Germany.
- Provided instructions to local and India team on certain correction needed on their task.
